

Vision Lite – Framed - Low-Profile Kit

The Syntégra low-profile vision kit provides the right balance of structural integrity along with industry-leading aesthetics. The Syntégra kits offer smooth - tight miters without unsightly weld marks to distract from the appearance. These kits are compatible with all Syntégra door models (within listing limitations), and this type of kit is required for doors using Surfacequest Architectural veneers.

Standard Features

- Material: 20ga Cold Rolled Steel
- Standard Finish: Mineral Bronze baked enamel
 - Other finishes available on special order
- Glazing: Should be 1/4", 3/16", or 5/16" fire and/or safety rated with testing agency classification markings
