RE: Syntégra Integrated Doors Assemblies – MSDS

To whom it may concern:

Syntégra products are considered an **Article** and fall within the following OSHA regulations concerning hazardous materials:

**OSHA Hazard Communication - 29 CFR 1910.1200**

Article means a manufactured item other than a fluid or particle: (i) which is formed to a specific shape or design during manufacture; (ii) which has end use function(s) dependent in whole or in part upon its shape or design during end use; and (iii) which under normal conditions of use does not release more than very small quantities, e.g., minute or trace amounts of a hazardous chemical (as determined under paragraph (d) of this section), and does not pose a physical hazard or health risk to employees.

As supplied from the factory, Syntégra products do not require Material Data Safety Sheets or special hazardous material markings. MSDS for field-applied finishes should be obtained from the respective manufacturer.

If I can further, then please feel free to contact me directly.
