

Levers – Décor Series

Syntégra’s ‘by design’ commitment extends to all aspects of the door system. We are constantly refining and expanding our offering to include functional and aesthetic benefits that building owners truly appreciate.

In keeping with this commitment, we have partnered with Frascio International, the premiere designer of architectural levers, to adapt their extensive line of over 100 levers styles, to work in harmony with all Syntégra door systems. The levers shown below are only a small sampling of the broader offering available. Click: <https://bit.ly/3moe3kj> to view the entire line of compatible levers.

Features/Options

- Available in a variety of styles and finishes
- Small-format 2” rose standard
- Designs available with the lever tip that returns within ½” of the door face
- Compatible with all Syntégra XT, PX, and LX door systems
