

## Powder to the People!

### Powder Coat Finishing –

Syntégra's "by design" philosophy is an ongoing commitment that empowers customers to configure and control the various functional, protective, and the aesthetic features of their openings.

To further this promise, Syntégra is pleased to announce the addition of factory applied powder coating to their door finishing options. Powder coating raises the 'finish' bar with outstanding strength, elasticity, and corrosion resistance that wet paint just cannot match. In addition, the no-waste and no-VOC application process is the most environmentally conscious way to finish a door.

The vast array of color options from Syntégra are designed to inspire architects and owners by providing them the freedom to coordinate powder coated surfaces with the look and feel of a wide variety of building materials. Applying these coatings in a factory-controlled setting ensures the highest quality finish without the disruptions and odors caused by field painting.

Optional Antimicrobial additives work to suppress the growth of bacteria that can cause issues such as bacteria growth, mold and mildew. Treating the door and hardware with these special formulas promotes healthier environments.

Factory finishing alleviates many of the headaches associated with field painting. Syntégra's powder coating option offers customers a more durable, safer and cleaner alternative.

### Benefits –

- Enhanced durability
  - Superior scratch, chip and corrosion resistance
  - Highest color retention
- Consistent appearance
  - Factory applied
  - Controlled environment
- Eco-Friendly
  - No solvents or VOC's
  - No hazardous air pollutants
  - No-waste process
  - LEED Credits available
- Cost effective
  - Fixed application costs
  - Lasts longer than paint
  - No facility disruption

### Options –

- Variety of colors
- Silver ion infused Antimicrobial additives for schools, healthcare and germ sensitive environments.
- Available on rated and non-rated doors

### Specifications –

- Textured matte finish standard
- Honeycomb construction doors only
